EXPERIENCE

Research Assistant

Indian Insittute of Science

May 2018 – Jan 2019 Bangalore, India

- Implemented image processing techniques on different video graphic data for animal detection in ecology.
- Techniques used are image segmentation using **Colour threshold**, motion detection using **Image subtraction** and tracking species using **Convolutional Neural Networks**.
- **Technologies Used:** Python,Matlab

ACADEMIC PROJECTS

Food detection on 2-D pictures using Deep learning

Code

Uppsala University January 2020 – March 2020

Uppsala, Sweden

- Created a model to detect food items (Pancake,Bread,Milk,Cheese and Apple) using state- of-the-art,real time object detection system called **YOLO (You only Look Once)**.
- **Technologies Used:** Python, Tensorflow

Automated Hand-Gesture Hospital Receptionist Communicator

Code

Uppsala University March 2020 - June 2020

Uppsala University

- Built a system that takes a video showing gestures as input and makes a virtual agent respond to these gestures.
- Extracted the landmarks of the hand using the **Convolutional Neural Network** model, detected the hand gesture using **Multi Layer Perceptron algorithm** and used the detected gesture to show the response of a virtual agent.
- **Technologies Used:** Python, IntelliJ IDEA , Kotlin

American Sign Language Hand Gesture Recognition

Code

Uppsala University January 2020 - June 2020

Uppsala University

- Recognizing the American Sign Language Hand gestures using basic **Convolutional Neural Network** and classifying the sign language.
- Obtained an accuracy of 95% without **Data Augmenting** and 99% with **Data Augmenting** that showed the significance of data augmentation.
- **Technologies Used:** Python, Keras

CAREER OBJECTIVE

To pursue a career in the field of Computer Science and be part of a progressive organization that gives scope to enhance my knowledge and skills to reach the pinnacle of the organization.

EDUCATION

M.Sc. in Computer Science

Uppsala University, Uppsala,Sweden

September 2019 – Ongoing

Courses:

- Computer Vision
- Machine Learning
- Database Design
- Algorithms and Data Structures

B.Tech. in Computer Science and Technology

Bangalore,India

September 2015 – July 2019

Courses:

- Data Mining
- Web Development
- Data Analytics

TECHNICAL SKILLS

Programming Languages - Python, MATLAB, JavaScipt, HTML, CSS

Skills - Machine Learning, Deep Learning, Image Analysis, Image Processing, Computer Vision, Data Visualisation,Microsoft Excel

Software Packages - Keras, Tensorflow, Numpy, Pandas, Scikit-Learn, OpenCV, Matplotlib

Databse - MySQL

EXTRA CURRICULAR ACTIVITIES

- Football
- Frisbee
