EXPERIENCE

Research Assistant

Indian Insittute of Science

May 2018 – Jan 2019 Bangalore, India

- Developed image processing techniques on different video graphic data for animal detection in ecology.
- Techniques used are image segmentation using colour thresholding, motion detection using image subtraction and Convolutional Neural Networks.
- **Technologies Used:** Python,Matlab

PROJECTS

Food detection on 2-D pictures using Deep learning

Uppsala University

January 2020 – March 2020 Uppsala, Sweden

- Computer Assisted Image Analysis- II project
- Description – The model was able to detect food items like Pancake,Bread,Milk,Cheese and Apple in real-time with fast inference while maintaining a good level of accuracy.
- **Technologies Used:** Python, pandas,numpy,computer vision,image analysis.

Automated Hand-Gesture Hospital Receptionist Communicator

Uppsala University

Uppsala University March 2020 - June 2020

- Intelligent Interactive Systems project.
- Description – Developed an interface to understand sign languages using landmark recognition and book an appointment in the hospital;
- **Technologies Used:** Python ,MLP ,IntelliJ IDEA ,Kotlin;

Classification and analysis of electroencephalography(EEG) signals using Machine Learning

NMIT- Bangalore, Karnataka

January 2019 – May 2019 Bangalore, India

- Bachelor's degree final project;
- Description – Created an interface to classify and analyse the EEG signals using clustering-based algorithms.
- **Technologies Used:** Python, HTML, CSS, JavaScript;

CAREER OBJECTIVE

To pursue a career in the field of Computer Science and be part of a progressive organization that gives scope to enhance my knowledge and skills to reach the pinnacle of the organization.

EDUCATION

M.Sc. in Computer Science

Uppsala University, Uppsala,Sweden

September 2019 – Ongoing

Courses: Computer Assisted Image Analysis, Natural Computation Methods for Machine Learning, Algorithms and Data Structures.

B.Tech. in Computer Science and Technology

Bangalore,India

September 2015 – July 2019

Bachelor's degree final project: Classification and Analysis of Electroencephalography(EEG) signals using Machine Learning.

SKILLS

HTML | CSS | JavaScipt | Python | MATLAB | Node JS | Express | MangoDB | React Js | AngularJs | Machine Learning | Image Analysis | SQL | Spark | Kotlin | C | C++ | Hadoop | Data Analysis

EXTRA CURRICULAR ACTIVITIES

- Football
- Ultimate Frisbee
- Keyboardist
