Education

2019–Present **Masters in Computer Science**
Uppsala University, Uppsala, Sweden `https://www.uu.se/en//`

2015–2019 **Bachelor of Technology in Computer Science & Engineering**
Nitte Meenakshi Institute of Technology, Bangalore, India `http://www.nmit.ac.in//`
CGPA – 8/10

Experience

2021 Jan-Present **Master's Thesis**
Uppsala University, Uppsala, Sweden `http://www.cb.uu.se/`
I am currently working on Master Thesis titled "Image processing in MRI guided real-time adaptive radiotherapy" at Center of Image Analysis Department. Developing a real-time segmentation method that generates high-resolution 3D segmentation of prostate gland in the pelvic area.
Programming Languages: Python, Tensorflow

2020–2020 Sep-Dec **Machine Learning Intern**
SustainLab, Stockholm, Sweden `http://www.sustainlab.co/index.html`
We developed a RESTful API and deployed it on GCP to extract relevant information from different file formats (PDF, png, txt) and convert it into a spreadsheet for data analysis. Experience writing APIs with software working with and engineering team - preferably in an Agile development environment. Performed functional tests for applications, code reviews and technical discussions.
Programming Languages: Python, React.js, Typescript, Express, Node.js

2018–2019 Aug-Jun **Research Assistant**
Indian Institute of Science, Bangalore, India `http://ces.iisc.ac.in/new/s`
I worked on a project that aimed at comparing the efficacy of three different image-processing techniques for animal detection in three species of animal groups.
Programming Languages: Python, Matlab, Javascript

Technical Skills

Programming Languages	PYTHON, JavaScript, Java, React, Node.js, Express, MATLAB
Relevant Course Work	Applied Cloud Computing, Data Structures, Object-Oriented Programming, Database Management, Data Mining, Operating Systems, Machine Learning, Script Programming
Database	SQL, NoSQL, MangoDB
Skills	REST APIs, Git, Docker, Microservices, Kubernetes, Orchestration technology, JIRA, Agile, Virtualization, CI/CD
Soft Skills	Problem-Solver, Fast learner, Time management, Team-player, Communication

Projects

2020 Sep-Nov **BENCHOP - Applied Cloud Computing**.

- The aim of this project was to develop a BENCHOP as a Service functionality,a cloud service in openstack that runs in parallel and enables the user to access the features of BENCHOP via command line commands or an Interface.

2020 Apr-Jun **Automated Hand-Gesture Communicator**.

- Built a system that takes a video showing gestures as input and makes a virtual agent respond to these gestures using Convolutional Neural Network model and Multi Layer Perceptron algorithm.

2020 Apr-Jun **Student Grade's Analysis - Data Mining**.

- Investigated large amount of data and visualised to find the different factors that affects the student's grades using during post-secondary education using machine learning algorithms.

2019 Oct-Dec **Reddit Analysis - Large Datasets for Scientific Applications**.

- Developed a horizontally scalable data processing solution and demonstrated the scalability (Weak Scalability and Strong Scalability) tests in suitable computational analysis for the Reddit dataset.

Summer School and Seminar

2020 I gave a seminar on the basics of Computer Vision and my work to the entire team of Sustainlab that consists of various backgrounds.

2018 Participated in 6th CSA Undergraduate Summer School held during July 2-7 at the Department of Computer Science and Automation, Indian Institute of Science, Bengaluru, India.

Extra-Curricular Activities

2020 Participated in the Sweden's biggest frisbee mixed tournament held on 23rd January at Gothenburg, Sweden.

2019 Captained and represented the Indian Institute of Science team of frisbee at many national level ultimate frisbee tournaments.

2017 Attended workshop "Building Applications on Cloud" on 14th October at Nitte Meenakshi Institute of Technology, Bangalore, India.
